Usability

Your usability could be better

Your page is OK but could be more usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

Google's Core Web Vitals

Google is indicating that they do not have 'sufficient real-world speed data for this page' in order to make a Core Web Vitals assessment. This can occur for smaller websites or those that are not crawl-able by Google.

Use of Mobile Viewports

Your page specifies a viewport matching the device's size, allowing it to render appropriately across devices.

Google's PageSpeed Insights - Mobile

Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation.

Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localizes to the region in which you are running the report.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

Lab Data	Value	Opportunities	Estimated Savings
First Contentful Paint	5.3 s		
Speed Index	9 s	Eliminate render-blocking resources	3.61 s

Flash Used?

No Flash content has been identified on your page.

iFrames Used?

Your page appears to be using iFrames.

iFrames are discouraged as they can complicate navigation of content in mobile and have historically been harder to index for search engines.

Favicon

Your page has specified a favicon.

Email Privacy

No email addresses have been found in plain text on your page.

Legible Font Sizes

The text on your page appears to be legible across devices.

Tap Target Sizing

Some of the links or buttons on your page may be too small for a user to easily tap on a touchscreen.

Consider making these tap targets larger to provide a better user experience.

Performance Results

Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

Page Speed Info

Your page loads slowly.

Page load speed is critical to ensuring good user experience and is becoming a more important ranking factor. Load speed can be impacted by a multitude of factors however and may need technical resources to investigate.

HTTP2 Usage

Your website is using an outdated HTTP protocol.

We recommend enabling HTTP/2+ or protocol for your website as it can significantly improve page load speed for users.

Optimize Images

All of the images on your page appear to be optimized.

Minification

All your JavaScript and CSS files appear to be minified.

Deprecated HTML

Deprecated HTML tags have been found within your page.

These tags are no longer officially supported in modern web browsers, and hence are recommended to be removed as they could cause display issues.

Your social needs improvement

You appear to have a weak social presence or level of social activity (or we may just not be able to see your profiles!). Social activity is important for customer communication, brand awareness and as a marketing channel to bring visitors to your website. We recommend that you list all of your profiles on your page for visibility, and begin to build a following on those networks.
